dalam jasa cctv! gmail This is why no one finds ANYTHING IMPORTANT happening in the remote sensors, as they're always busy burning up and getting fried from impacts. A few days ago, an interesting thread appeared on the RCGOD Forum where someone found a really cool story about a C-130 that flew into a camera and the sound of the collision was captured. Did you ever hear about the C-130 that flew into a camera? Eiji wrote:I'm constantly looking for pics of UAV strikes as I realize the insane cost of this thing that we could have spent on a car. Hi Eiji, I've been at this for a few months now and I'm thinking about buying a couple of the Ultras, the C-130 and maybe a few others like the F16 which really looks cool. Hopefully I will have these images that I'm looking for in the next few months. Seeing the F16 in your dream sequence is a good sign. I am looking to replace my old RC-10 which looks as ugly as the first version of the F16 which I have now. I would suggest keeping an eye on the F15 as they will be replacing the F16 in later models, and yes, that version looks awesome. Here are a couple of videos I put together for a competition. If you put one of these guys in your garage, they will start picking up your electronics just by using radar and lasers. They have some crazy capability if you watch the videos and take it as fact. I hope that was useful and that I didn't sound as silly in the videos. Cheers, Lars Sticked by RavageSparrow Post subject: Re: Hotshot #6 - Tutorials Posted: Sat Oct 21, 2017 4:10 am Joined: Sun Dec 08, 2004 4:52 pmPosts: 2256 Omg... the noise was as bad as the cctv! cctv! Lars wrote:Sticked by RavageSparrow Oh I'm glad you got a good laugh out of it. For me, I actually got a chuckle out of it and it gave me a good chuckle. I've been in similar situations before and even I've 82157476af
